On August 13, Epic Games published an upgrade for Fortnite on iOS along with Android apparatus that could allow players to endanger their apparatus's program shop and purchase V-Bucks directly from Epic Games at a discount. Apple has been the first to ban Fortnite out of its app store and almost any future updates. In retaliation to the ban, Epic Games filed a lawsuit against Apple for harboring an anti-competitive market combined with various other claims. Fortnite cell players have returned to alternative platforms or have remained platform less.

The Fortnite iOS and Mac community continues to voice its woes under nearly every place made by Fortnite affiliated accounts. They've been discovered, and Epic Games announced via the Fortnite Status Twitter account that select Fortnite cellphone and Mac players would be finding a V-Buck grant. This will not affect all Fortnite cellphone users, just those who purchased V-Bucks throughout the Apple app store and have yet to pay them. Epic Games is diminishing the number of all unspent V-Bucks that were purchased through the app store for iOS and throughout the Epic Games Store on Mac, with the replacement V-Bucks usable on almost any platform.
